Professional Experience

AI Solutions Developer, Louisiana State University Human Resources | *Baton Rouge, Louisiana | August 2024 - Present*
- Developed and implemented an AI-powered applicant shortlisting tool, using GPT-4o-mini refined with internal documents processed with RAG and BM25 techniques
- Optimized the hiring and candidate search process for the 6000+ faculty and staff at Louisiana State University
- Accurately predicted candidates that would be a best fit for hire and provided suggestions to hiring managers

Junior Software Engineer, Vigilus | *Baton Rouge, Louisiana | September 2022 - Present*
- Developed and deployed web and mobile applications using **React**, **React Native**, **TypeScript**, **CSS**, and **Tailwind**, delivering high-quality solutions for multiple clients.
- Implemented and maintained **CI/CD pipelines** with **AWS** and **Firebase**, ensuring seamless deployment and integration of applications.
- Conducted peer reviews and **QA testing** for code written by interns and junior developers.

Software Engineering Intern, Chevron | *Houston, Texas | May 2024 - August 2024*
- Developed an in-house solution for displaying 3D reservoir data including functionality to visualize static and time-based data more easily. Saving our team $12,000 annually.
- Used **Three.js** and **Angular** for the front-end development of the 3D file visualization features.
- Developed a **Python** back-end with **Flask** and **Blender**, to decompile eclipse EGRID, INIT, and UNRST files and swiftly return formatted STL files for front-end visualization. Deployed and hosted using **Azure Services.**

Software Engineering Intern, Chevron | *Houston, Texas | May 2023 - August 2023*
- Gained a working knowledge of Azure services including **Logic Apps**, **SQL Databases**, **Automated Data Factories**, and **CI/CD Pipelines** using **YAML**, and **Databricks**.
- Developed and deployed a scalable data pipeline to automatically ingest third-party information and then sort and process the information for further analysis and reporting, saving 200 hours of work annually and ensuring critical business data was up-to-date and accurate.

Web Development Intern, My Interview | *Tel Aviv, Israel | February 2022 - May 2022*
- Used **Vue, JavaScript,** and **SCSS** to develop platform responsiveness and improve user experience across all devices.
- Implemented **Google Analytics** into the product to better understand customer behavior and areas for improvement.

Education

Louisiana State University | *Baton Rouge, Louisiana | August 2022 - May 2026 | 3.6 GPA*
- Bachelor of Science, Mathematics and Computer Science with a Software Engineering focus
- Member of Google Developer Student Club and Engineering Diversity Ambassadors
- Studied Large Language Model Design and Deployment for Business
- Dean's list | Fall 2022, Spring 2023, Spring 2024

Big Idea Bootcamp | *Jerusalem, Israel | August 2021 - December 2021*
- Developed proficiency using **Javascript**, **HTML/CSS**, **React**, and **Firebase**
- Earned certification in Web Development
